

HOT TOMATO PEACH

DIRECTIONS

1. Print labels onto full-sheet (8.5-by-11") white sticker paper. Each page includes label and decorative band designs.

- Print page 2 for 2.5" round labels, for tapered round jars. 6 per page.
- Print page 3 for 2" round labels, for narrow-mouth mason jars. 9 per page.

2. Cut out shapes using scissors or an Xacto knife. Or, if you happen to have a 2.5" or 2" round punch, you can use that to expedite the process.

3. Adhere to processed and cooled jars. The decorative band is designed to go up and over the top of the lid, with a round label on top, however (depending on the size of your jars) you could also go around the circumference of the jar as well.

TIPS & TRICKS

Print in full color, using the highest quality setting on your printer.

Print at 100% scale (make sure 'scale to fit' is unchecked) to ensure labels are printed at the correct size.

Weatherproof label material, if you can find it, will allow your labels will better hold up to the elements (refrigerator condensation, for example). You can choose inkjet or laser material depending on what kind of printer you have.

For mason jars with two-piece lids, you can also print the 2" labels onto cardstock and screw the metal ring on top of it, or punch a hole and use as a hang tag.
